### **1. BusReserve**

A bus reservation app is a mobile application designed to make it convenient for users to book and manage bus tickets. It allows individuals to browse through a variety of bus routes, select their desired departure and arrival locations, and choose their preferred travel dates and times. The app provides real-time information about available bus seats, fares, and different bus operators.

## 2. Student App

The student registration app is a mobile application designed to streamline and simplify the process of registering students for educational institutions such as schools, colleges, or universities. It provides an efficient way for students to complete their registration, print their transcript, seek the given courses and the correspondent time table. The student will be able also to have the list of courses done and those are remaining in his cursus, and the list of courses which will be repeated (failed courses)

## 3. Barber HairDresser

A barber app reservation system is a mobile application that allows users to schedule appointments and book services at barber shops or hair salons conveniently. The app serves as a platform for customers to browse through available barbers, view their profiles, check their availability, and book appointments based on their preferences.
